RE: Laboratory Move

Marshfield Labs first began serving clients in 1973. Since that time we have grown to serve both the medical and veterinary communities with the latest in diagnostic technology and the employees to support our Outreach mission.

Our main lab in Marshfield, Wisconsin has outgrown its current space and will be moving to a brand new laboratory located on the Marshfield Clinic campus. As we transition our equipment and personnel to the new building we ask for your patience.

We will begin our move with the Reference Anatomic Pathology Department on August 25th. During the week of September 2nd we anticipate that all remaining departments will be moved and in their new space by September 8th.

Our toll-free telephone number and our mailing address will remain the same. We are however, moving to a new telephone system and ask that you bear with us as our staff becomes familiar with it. Clients might also experience a delay in supply orders during the move-in period.

While we have prepared extensively for this move and have tried to plan it with little or no disruption of our services, we wanted to make you aware of the possibility.

Please contact Customer Service at 800-222-5835 with any questions or concerns.
