Kidney Stone Testing Change

Effective December 8, 2021 Marshfield Laboratories will be sending kidney stones to Mayo Clinic Laboratories for analysis rather than the Louis Herring Laboratory.

Kidney Stone Testing Change

New Kidney Stone Test

The rationale for the change to Mayo Clinic Laboratories is two-fold. Having a dedicated courier service to Rochester, MN allows for timely specimen transport. In addition, Marshfield Labs has an electronic interface with Mayo Clinic Laboratories which allows for reporting to be done in a more efficient manner.

Mayo uses similar infrared analysis to Louis Herring Laboratory and we believe this will continue a comparable, high level of quality and service.

How to order this test:

Test Code: STONEM

Description: Kidney Stone Analysis (Mayo test code: KIDST)
